- Very high developer involvement
- Best for scalable enterprise platforms

Our Process

1. Team Meetings & Requirement Gathering

Conduct discussions with stakeholders to understand business goals and user needs.

2. Website Analysis & Market Research

For existing websites, we assess homepage performance, user behavior, and competitor benchmarks to identify improvement areas.

For new websites, we conduct market research and analyze user expectations to define a strong foundation for structure and content.

3. Ideation

Develop creative concepts and strategies to enhance brand identity and user engagement.

4. Homepage Information Architecture

Structure content, navigation, and CTAs for an optimized user journey and improved lead conversion.

Our Process

5. Wireframing

Create low-fidelity wireframes to visualize the structure and layout of the homepage.

6. Design System & Mood Boarding

Establish a design system and visual inspiration to maintain consistency and align with brand aesthetics.

7. Homepage High-Fidelity UI Design in Figma

Develop a polished, modern design that prioritizes user experience and responsiveness.

8. Feedback & Revisions

Develop creative concepts and strategies to enhance brand identity and user engagement.

Communication & Collaboration

- Fineart follows an Agile methodology on project management. Under Agile, we use the scrum framework.
- End-of-sprint demonstration meetings to review deliverables and present upcoming sprint plans.
- Fineart utilizes Azure DevOps for efficient project tracking and collaboration.
- Coordination will be maintained through Microsoft Teams or Zoom, and email for seamless collaboration and prompt responses.
